

投石机

1. 学习目标

这节课程我们主要使用 micro:bit 和 Super:bit 扩展板综合控制 270°积木舵机。

2. 编程方式

方式一在线编程: 首先将 micro:bit 通过 USB 连接电脑,电脑会弹出一个 U盘, 点击 U盘里的网址: http://microbit.org/进入编程界面。添加亚博智能软件包 https://github.com/lzty634158/SuperBit,即可进行编程。

方式二离线编程: 打开离线编程软件,进入编程界面,点击新建,添加亚博智能软件包 https://github.com/lzty634158/SuperBit,即可进行编程。

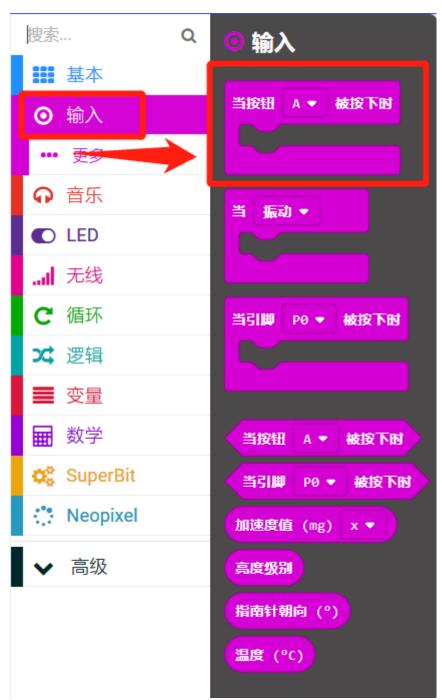

3. 寻找积木

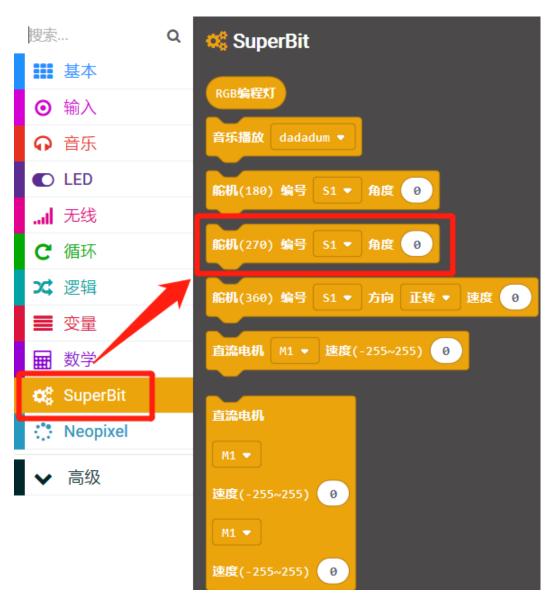

以下为本次编程所需积木块的位置。

4. 组合积木

汇总程序如下图所示:

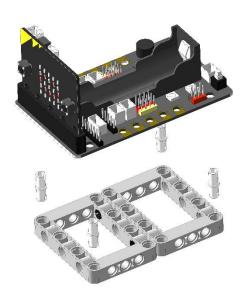

5. 积木搭建

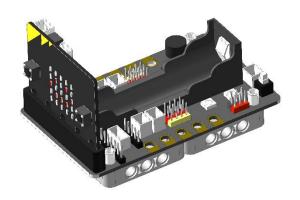

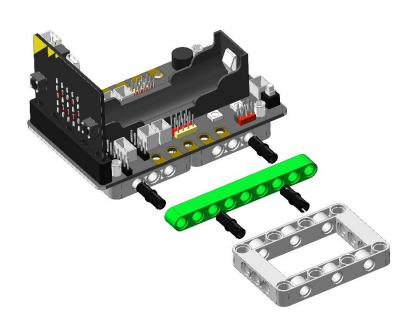

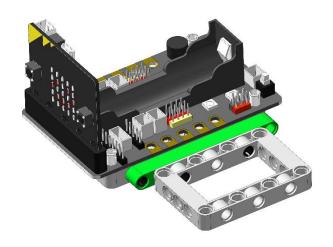

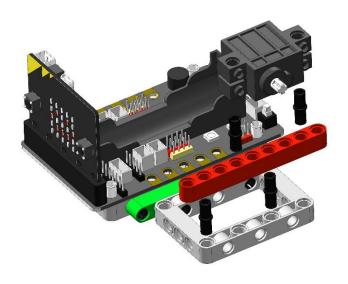

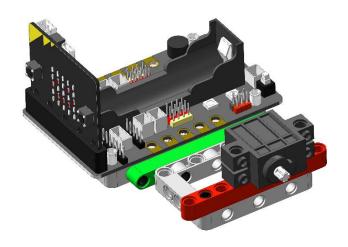

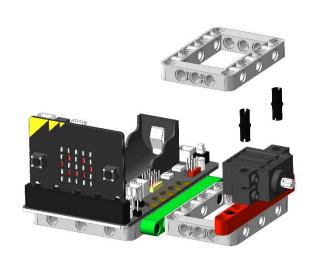

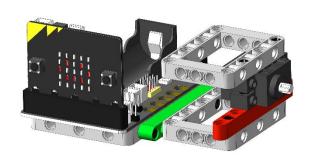

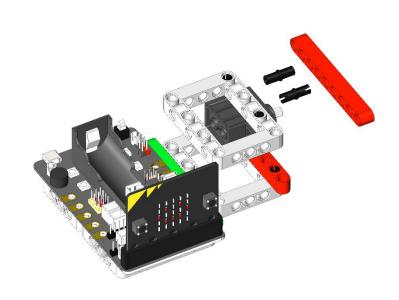

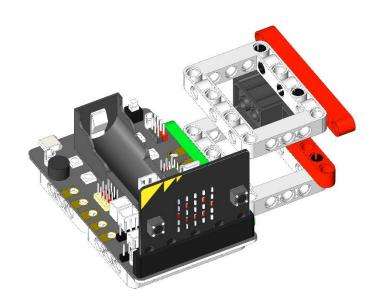

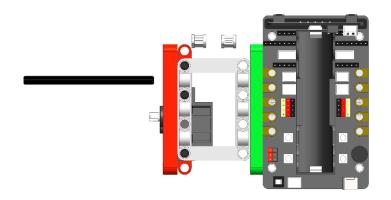

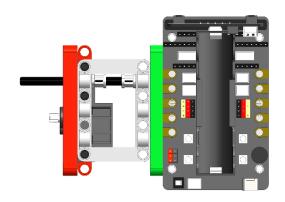

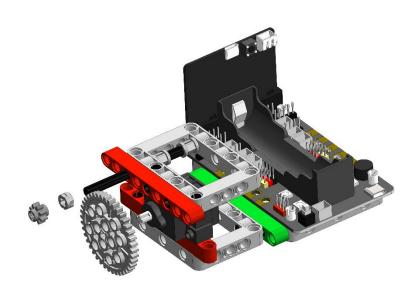

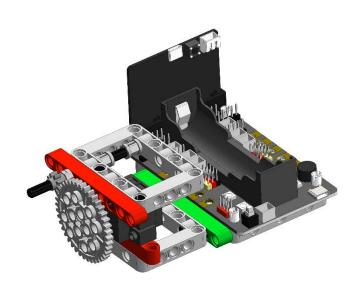

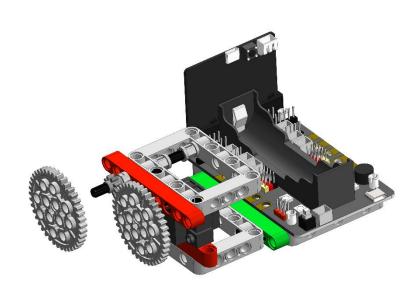

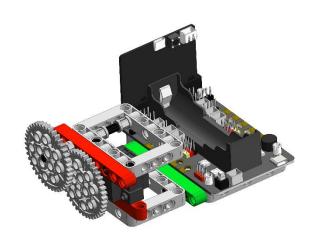

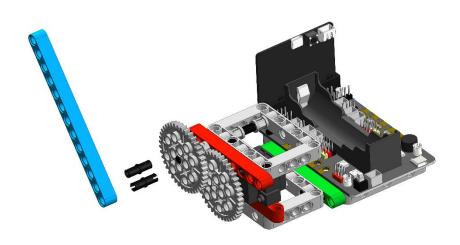

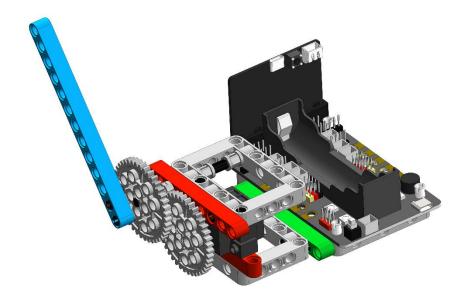

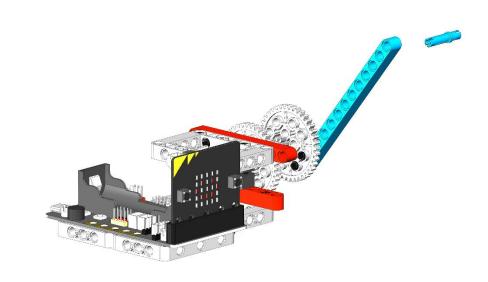

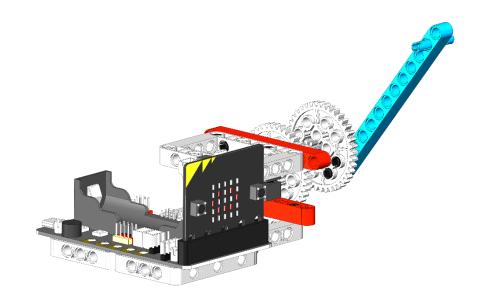

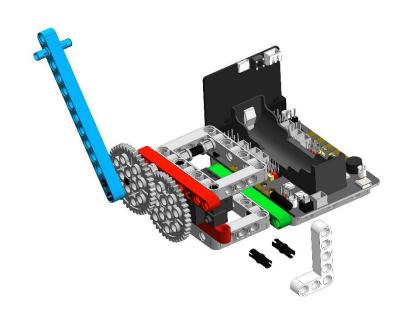

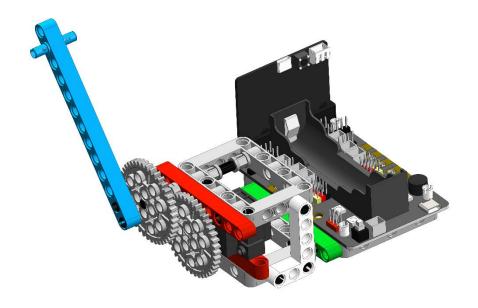

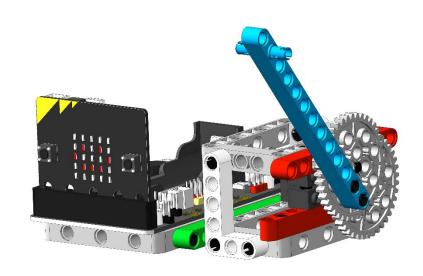

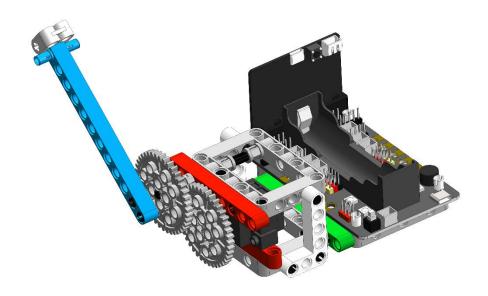

将 270°积木舵机连接到 Super:bit 扩展板的 S5 接口,即舵机橙色线接在 S5 黄色接脚,红色线接红色接脚,棕色接黑色接脚。

6. 实验现象

程序下载成功以后, micro:bit 点阵会显示爱心; 按下 A 键投石机将物体投出, 按下 B 键归位; 如果需要重新开始请按下 micro:bit 主板背后的复位键。
